## **NATIONAL GUARD AIRPORT SECURITY OPERATIONS**

**EXPIRES 30 SEPTEMBER 2002**

1. Due to the recent terrorist activities, the President of the United States authorized and requested that the Governors of the several States, Territories, and US Possessions use National Guard forces to provide supplemental personnel for airport security operations. The mission of the National Guard personnel is to "provide a trained, armed, secure, military presence at airport facilities of the United States to reinforce the civilian security function." National Guard personnel will supplement, not replace, the existing airport security function.
2. The Adjutant General (TAG) may use Army and Air Guard technician/AGR personnel in the performance of this mission. The mission is a phased operation that may initially require an involuntary call up of required personnel and later phase in the use of trained and qualified volunteers. This mission is not expected to extend beyond a 6-month period and will have a determined exit strategy.
3. Personnel will be ordered to "Other Duty" under 32 USC § 502 (f). Due to the public nature of this mission, personnel must meet or exceed standards of military bearing and appearance. Selected personnel should meet the screening standards IAW NGR 500-2, para 8-8. Personnel assigned to this mission will receive baseline training from the Federal Aviation Administration (FAA).
4. Some technician personnel are needed in their current capacity to support mobilizations and other critical California National Guard missions. When a technician is considered for airport security duty it is required that his/her Military commander and full-time supervisor coordinate to ensure all normal mission requirements can be accomplished. It is preferred that the airport security mission be accomplished without a "critical" technician if possible.
5. Point of Contact for additional information is MAJ Steve Buethe at CAGNET 63412, DSN 466-3412, or commercial (916) 854-3412.
